NATIONAL BUREAU OF STANDARDS, Ernest Ambler, *Director*

Foreword

Federal Information Processing Standards Publications of the National Bureau of Standards are adopted and promulgated under the provisions of Public Law 89-306, and Part 6 of Title 15 Code of Federal Regulations. These standards are required for implementation by Federal agencies in the acquisition, development and use of automated information systems and in the interchange of data between and among agencies and with the public. The use of such standards which are adopted after extensive review by Federal agencies, industry and the public are intended to reduce government costs and improve the effectiveness of government services.

Comments concerning Federal Information Processing Standards Publications are welcomed, and should be addressed to the Director, Institute for Computer Sciences and Technology, National Bureau of Standards, Washington, D.C. 20234.

Ernest Ambler, *Director*

Abstract

This standard provides classifications, short titles, and codes for representing industries. The general concept of an industry is one of a group of establishments with similar economic activities. The SIC codes, initially developed by the Office of Management and Budget, are currently being maintained and published by the DOC Office of Federal Statistical Policy and Standards, the organization to which this function has been transferred. Their implementation in Federal ADP systems will avoid unnecessary and costly incompatibilities in the collection, processing and dissemination of data.

Key words: Computers; data processing; Federal Information Processing Standards Publication; industries; representations and codes; Standard Industrial Classification.

ANNOUNCING THE STANDARD FOR

STANDARD INDUSTRIAL CLASSIFICATION (SIC) CODES

FIPS PUB 66

Federal Information Processing Standards Publications are issued by the National Bureau of Standards pursuant to the Federal Property and Administrative Services Act of 1949, as amended, Public Law 89-306 (79 Stat. 1127), Executive Order 11717 (38 FR 12315, dated May 11, 1973) and Part 6 of Title 15 Code of Federal Regulations (CFR).

Name of Standard. Standard Industrial Classification (SIC) Codes, (FIPS PUB 66).

Category of Standard. Federal General Data Standard, Representations and Codes.

Explanation. This standard provides classifications, short titles, and codes for representing industries. The general concept of an industry is one of a group of establishments with similar economic activities. The SIC codes, initially developed by the Office of Management and Budget, are currently being maintained and published by the DOC Office of Federal Statistical Policy and Standards, the organization to which this function has been transferred.

Approving Authority. Secretary of Commerce.

Maintenance Agency. Department of Commerce, Office of Federal Statistical Policy and Standards, Washington, D.C. 20230.

Questions concerning the list of industries and codes should be addressed to the Maintenance Agency. The Maintenance Agency will provide to the National Bureau of Standards changes relating to SIC industries, their definitions and codes. Users of this FIPS PUB who need to be notified of changes to this standard can complete the change request form included on page 23 of this publication and return it as indicated to the National Bureau of Standards. Change notices will be issued by NBS based upon the information provided by the Office of Federal Statistical Policy and Standards.

Cross Index. The SIC codes adopted by this standard have been taken from the Standard Industrial Classification Manual dated 1972, published by the Office of Management and Budget, and the 1977 Supplement, published by the Office of Federal Statistical Policy and Standards, the organization to which this function has been transferred. Inquiries relating to these publications should be directed to the Maintenance Agency indicated above.

Applicability. This standard is prescribed for the interchange of data among agencies and between agencies and the public including industry and State and local governments. Use within agency data systems is encouraged when such use contributes to operational benefits, efficiency, or economy.

This classification should be used whenever data for domestic establishments need to be classified industrially. For international comparisons, the SIC can be converted to the International Standard Industrial Classification (ISIC) with minor exceptions where the U.S. has a different classification structure.

Implementation Schedule. Provisions of this standard become effective six months after publication of the FIPS PUB.

Where data interchange is based upon reporting requirements in Federal or departmentwide programs, the implementation of this standard needs to be coordinated by the organization having

the authority to impose the reporting requirement. Exceptions, deferments and revisions of this standard will be considered under the provisions of section 6.8, Part 6 of Title 15 CFR.

Specifications. Federal Information Processing Standard 66 (FIPS 66), Standard Industrial Classification (SIC) Codes (affixed).

Waiver Procedure. Heads of agencies may request the provisions of this standard be waived in instances where its use would seriously affect the capability of the agency in performing its operational mission. Such waiver requests will be reviewed and approved by the Secretary of Commerce. Correspondence setting forth the reasons and justification for the waiver should be included in the waiver request.

Forty-five days should be allowed for review and response by the Secretary of Commerce. Waiver requests shall be submitted to the Secretary of Commerce, Washington, D.C. 20230, and labeled as a Request for Waiver to a Federal Information Processing Standard. No action will be taken by the agency to deviate from the standard prior to the receipt of a waiver approval response from the Secretary of Commerce.

Qualifications. None.

Where To Obtain Copies. Copies of this publication are for sale by the National Technical Information Service, U.S. Department of Commerce, Springfield, Virginia 22161. When ordering, refer to Federal Information Processing Standards Publication 66 (NBS-FIPS-PUB-66), and title. When microfiche is desired, this should be specified. Copies of the Standard Industrial Classification Manual 1972 and the 1977 Supplement are for sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402, Stock Nos. 4101-0066 and 003-005-00176-0, respectively. Payment may be made by check, money order, or deposit account.

Magnetic tape copies of the official titles, short titles and index items are also for sale by the National Technical Information Service, U.S. Department of Commerce, Springfield, Virginia 22161.

Special Information. In order to provide a better understanding of the principles of the SIC, a portion of the Introduction to the 1972 Manual follows. The SIC Manual has been scheduled for a revision to be published in 1982.

Introduction

THE STANDARD INDUSTRIAL CLASSIFICATION OF ESTABLISHMENTS

Purpose and Scope of the Classification

The Standard Industrial Classification was developed for use in the classification of establishments by type of activity in which they are engaged; for purposes of facilitating the collection, tabulation, presentation, and analysis of data relating to establishments; and for promoting uniformity and comparability in the presentation of statistical data collected by various agencies of the United States Government, State agencies, trade associations, and private research organizations. The Standard Industrial Classification for establishments differs from a classification for enterprises or companies. An Enterprise Standard Industrial Classification related to the Standard Industrial Classification has been developed for use in classifying enterprises. Other classifications have been developed for use in the classification of commodities or products and also for occupations.

The Standard Industrial Classification is intended to cover the entire field of economic activities: agriculture, forestry, fishing, hunting, and trapping; mining; construction; manufacturing; transportation, communications, electric, gas, and sanitary services; wholesale and retail trade; finance, insurance, and real estate; personal, business, repair, and other services; and public administration.

Principles of the Classification

In preparing the Classification, the Technical Committee on Industrial Classification was guided by the following general principles:

- (1) The Classification should conform to the existing structure of American industry.
- (2) Each establishment is to be classified according to its primary activity.
- (3) To be recognized as an industry, the group of establishments constituting the proposed classification must be statistically significant in the number of persons employed, the volume of business done, and other measures of economic activity.

Definition of Establishments. For purpose of this classification, an establishment is an economic unit, generally at a single physical location where business is conducted or where services or industrial operations are performed. (For example: a factory, mill, store, hotel, movie theater, mine, farm, ranch, bank, railroad depot, airline terminal, sales office, warehouse, or central administrative office.)

Where distinct and separate economic activities are performed at a single physical location (such as construction activities operated out of the same physical location as a lumber yard), each activity should be treated as a separate establishment wherever: (1) no one industry description in the classification includes such combined activities; (2) the employment in each such economic activity is significant; and (3) reports can be prepared on the number of employees, their wages and salaries, sales or receipts, and other establishment type data.

For activities such as construction, transportation, communications, electric, gas and sanitary services, and similar physically dispersed operations, establishments are represented by those relatively permanent main or branch offices, terminals, stations, etc., which are either (1) directly responsible for supervising such activities, or (2) the base from which personnel operate

to carry out these activities. Hence, the individual sites, projects, fields, networks, lines or systems of such dispersed activities are not ordinarily considered to be establishments.

An establishment is not necessarily identical with the enterprise or company which may consist of one or more establishments. Also, it is to be distinguished from subunits, departments, or divisions. Supplemental interpretations of the definition of an establishment are included in the industry descriptions of the Standard Industrial Classification where appropriate. Central administrative offices and auxiliary units also further described in the manual are recognized as special types of establishments.

Structure of the Classification.

The structure of the classification makes it possible to tabulate, analyze, and publish establishment data on a division, a two-digit, a three-digit, or a four-digit industry code basis, according to the level of industrial detail considered most appropriate. An agency may use additional subdivisions within specific four-digit industries in adopting this classification for its own use, while still retaining comparability with the classifications used by other agencies.

It should be noted that the digit "9" that usually appears in the third or fourth digit position of the classification code designates miscellaneous three-digit groups or four-digit industries covering establishments "not elsewhere classified." These residual establishments do not usually constitute homogeneous primary activity groups; for purposes of this classification system they are grouped together and treated as a separate industry to retain the homogeneity of the other industries in the group.

Change in the Treatment of Ownership Characteristics. The classification has been changed so that all establishments primarily engaged in the same kind of economic activity are classified in the same four-digit industry, regardless of their types of ownership; hence, their owners may include such diverse legal organizations, as corporations, partnerships, individual proprietors, government agencies, joint ventures, etc.

This change from the 1967 edition removes "Government" as an industry division, per se, and treats it as an ownership characteristic. Government establishments, therefore, are now classified by their primary economic activity, rather than by type of owner. The ownership classification system shown in the 1972 SIC Manual can provide continuity between the 1967 SIC and the present one. Where applicable, at least summary data should be published separately for the private and Government establishments constituting an industry or industry group.

Basis of Code Assignment

Each establishment is assigned an industry code on the basis of its primary activity, which is determined by its principal product or group of products produced or distributed, or services rendered. Ideally, the principal product or service should be determined by its relative share of "value added" at the establishment. In practice, however, it is rarely possible to obtain this measure for individual products or services; typically, it is necessary to adopt some other criterion which may be expected to give approximately the same results in determining the primary activity of an establishment.

**Federal Information
Processing Standards Publication 66**

1979 August 15

SPECIFICATIONS FOR

STANDARD INDUSTRIAL CLASSIFICATION (SIC) CODES

Name of Standard. Standard Industrial Classification (SIC) Codes.

Category of Standard. Federal General Data Standard, Representations and Codes.

Explanation. This standard provides classifications, short titles, and codes for representing industries. The general concept of an industry is one of a group of establishments with similar economic activities.

Specifications. Listed in the Table are the short titles of the Standard Industrial Classification with their assigned numeric codes.

In applications where this standard is implemented in fixed length fields, the most significant characters of the code should be left justified. In these instances when an SIC code is less than the specified field length, the remaining character positions will be filled with a space character.

SIC codes are structured based upon classification significance. Accordingly, the least significant digits of the code (to the right) are dependent upon the more significant digits (to the left) for their meaning. Consequently, the least significant digits of the code cannot be used separate and apart from their associated more significant digits.

TABLE

List of SIC Codes and Their Short Titles

The official SIC titles of the divisions and the two-, three-, and four-digit industries are those shown in the SIC Manual. For various reasons, including presentation of statistical tables, it is desirable to have a standard list of short SIC titles so that all agencies may use the same short titles for the same codes as long as the titles fit the space requirements of the publication.

The standard short titles have been limited to 36 spaces for four-digit SIC codes and 38 spaces for two-digit and three-digit codes. Where a two-digit or three-digit group contains only a single four-digit industry, then the two-digit or three-digit titles are allowed 36 rather than 38 spaces.

It is understood, of course, that just as a title itself is not sufficient to define an industry, so too a short title may not appear to represent the same content as the official title. Content can only be defined by reference to the official title and description.

In view of the fact that the standard short titles are intended to apply to publication copy, abbreviations of individual words are avoided if at all possible. However in a number of instances, abbreviations are necessary, as follows:

admin	administration	Intl	International
&	and	misc	miscellaneous

NBS TECHNICAL PUBLICATIONS

PERIODICALS

JOURNAL OF RESEARCH—The Journal of Research of the National Bureau of Standards reports NBS research and development in those disciplines of the physical and engineering sciences in which the Bureau is active. These include physics, chemistry, engineering, mathematics, and computer sciences. Papers cover a broad range of subjects, with major emphasis on measurement methodology, and the basic technology underlying standardization. Also included from time to time are survey articles on topics closely related to the Bureau's technical and scientific programs. As a special service to subscribers each issue contains complete citations to all recent NBS publications in NBS and non-NBS media. Issued six times a year. Annual subscription: domestic \$17.00; foreign \$21.25. Single copy, \$3.00 domestic; \$3.75 foreign.

Note: The Journal was formerly published in two sections: Section A "Physics and Chemistry" and Section B "Mathematical Sciences."

DIMENSIONS/NBS

This monthly magazine is published to inform scientists, engineers, businessmen, industry, teachers, students, and consumers of the latest advances in science and technology, with primary emphasis on the work at NBS. The magazine highlights and reviews such issues as energy research, fire protection, building technology, metric conversion, pollution abatement, health and safety, and consumer product performance. In addition, it reports the results of Bureau programs in measurement standards and techniques, properties of matter and materials, engineering standards and services, instrumentation, and automatic data processing.

Annual subscription: Domestic, \$11.00; Foreign \$13.75

NONPERIODICALS

Monographs—Major contributions to the technical literature on various subjects related to the Bureau's scientific and technical activities.

Handbooks—Recommended codes of engineering and industrial practice (including safety codes) developed in cooperation with interested industries, professional organizations, and regulatory bodies.

Special Publications—Include proceedings of conferences sponsored by NBS, NBS annual reports, and other special publications appropriate to this grouping such as wall charts, pocket cards, and bibliographies.

Applied Mathematics Series—Mathematical tables, manuals, and studies of special interest to physicists, engineers, chemists, biologists, mathematicians, computer programmers, and others engaged in scientific and technical work.

National Standard Reference Data Series—Provides quantitative data on the physical and chemical properties of materials, compiled from the world's literature and critically evaluated. Developed under a world-wide program coordinated by NBS. Program under authority of National Standard Data Act (Public Law 90-396).

NOTE: At present the principal publication outlet for these data is the Journal of Physical and Chemical Reference Data (JPCRD) published quarterly for NBS by the American Chemical Society (ACS) and the American Institute of Physics (AIP). Subscriptions, reprints, and supplements available from ACS, 1155 Sixteenth St. N.W., Wash., D.C. 20056.

Building Science Series—Disseminates technical information developed at the Bureau on building materials, components, systems, and whole structures. The series presents research results, test methods, and performance criteria related to the structural and environmental functions and the durability and safety characteristics of building elements and systems.

Technical Notes—Studies or reports which are complete in themselves but restrictive in their treatment of a subject. Analogous to monographs but not so comprehensive in scope or definitive in treatment of the subject area. Often serve as a vehicle for final reports of work performed at NBS under the sponsorship of other government agencies.

Voluntary Product Standards—Developed under procedures published by the Department of Commerce in Part 10, Title 15, of the Code of Federal Regulations. The purpose of the standards is to establish nationally recognized requirements for products, and to provide all concerned interests with a basis for common understanding of the characteristics of the products. NBS administers this program as a supplement to the activities of the private sector standardizing organizations.

Consumer Information Series—Practical information, based on NBS research and experience, covering areas of interest to the consumer. Easily understandable language and illustrations provide useful background knowledge for shopping in today's technological marketplace.

Order above NBS publications from: Superintendent of Documents, Government Printing Office, Washington, D.C. 20402.

Order following NBS publications—NBSIR's and FIPS from the National Technical Information Services, Springfield, Va. 22161.

Federal Information Processing Standards Publications (FIPS PUB)—Publications in this series collectively constitute the Federal Information Processing Standards Register. Register serves as the official source of information in the Federal Government regarding standards issued by NBS pursuant to the Federal Property and Administrative Services Act of 1949 as amended, Public Law 89-306 (79 Stat. 1127), and as implemented by Executive Order 11717 (38 FR 12315, dated May 11, 1973) and Part 6 of Title 15 CFR (Code of Federal Regulations).

NBS Interagency Reports (NBSIR)—A special series of interim or final reports on work performed by NBS for outside sponsors (both government and non-government). In general, initial distribution is handled by the sponsor; public distribution is by the National Technical Information Services (Springfield, Va. 22161) in paper copy or microfiche form.

BIBLIOGRAPHIC SUBSCRIPTION SERVICES

The following current-awareness and literature-survey bibliographies are issued periodically by the Bureau:

Cryogenic Data Center Current Awareness Service. A literature survey issued biweekly. Annual subscription: Domestic, \$25.00; Foreign, \$30.00.

Liquefied Natural Gas. A literature survey issued quarterly. Annual subscription: \$20.00.

Superconducting Devices and Materials. A literature survey issued quarterly. Annual subscription: \$30.00. Send subscription orders and remittances for the preceding bibliographic services to National Bureau of Standards, Cryogenic Data Center (736.00) Boulder, Colorado 80303.

FIPS PUBLICATION CHANGE NOTICE

PUBLICATION TITLE

FIPS PUB 66, STANDARD INDUSTRIAL CLASSIFICATION (SIC) CODES.

THIS OFFICE HAS A RECORD OF YOUR INTEREST IN RECEIVING CHANGES TO THE ABOVE FIPS PUBLICATION. THE CHANGE(S) INDICATED BELOW HAVE BEEN PROVIDED BY THE MAINTENANCE AGENCY FOR THIS PUBLICATION AND WILL BE INCLUDED IN THE NEXT PUBLISHED REVISION TO THIS FIPS PUBLICATION. QUESTIONS OR REQUESTS FOR ADDITIONAL INFORMATION SHOULD BE ADDRESSED TO THE MAINTENANCE AGENCY:

Mr. Paul Bugg, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503, 202/395-3093. Address Corrections/changes to: Computer Systems Laboratory, Bldg. 225, Rm. B64, NIST, Gaithersburg, MD 20899.

CHANGE ITEM(S)

This change notice incorporates Change Notice 1 for FIPS 66 and provides information on the maintenance, applicability, and implementation of FIPS 66.

Federal Information Processing Standards Publications (FIPS PUBS) are issued by the National Institute of Standards and Technology (NIST) after approval by the Secretary of Commerce pursuant to Section 111(d) of the Federal Property and Administrative Services Act of 1949 as amended by the Computer Security Act of 1987, Public Law 100-235.

Name of Standard. Standard Industrial Classification (SIC) Codes, (FIPS PUB 66).

Category of Standard. Representations and Codes.

Explanation. This standard provides classifications, short titles, and codes for representing industries. The general concept of an industry is one of a group of establishments with similar economic activities. The SIC codes are developed and maintained by the Office of Management and Budget. This revised text for FIPS 66 reflects editorial changes and updates. This revised text and the Standard Industrial Classification Manual for 1987 comprise FIPS PUB 66 and supersede in its entirety FIPS PUB 66 dated 1979 August 15.

Approving Authority. Secretary of Commerce.

Maintenance Agency. Office of Management and Budget, Office of Information and Regulatory Affairs, Washington, DC 20503.

Applicability. This standard is prescribed for the interchange of data among agencies and between agencies and the public including industry and State and local governments. Use within agency data systems is encouraged when such use contributes to operational benefits, efficiency, or economy.

This classification should be used whenever data for domestic establishments need to be classified industrially. For international comparisons, the SIC can be converted to the International Standard Industrial Classification (ISIC) with minor exceptions where the U.S. has a different classification structure.

Effective date. February 15, 1980.

-contd.-

Specifications. The Standard Industrial Classification (SIC) Manual for 1987 issued by the Office of the Management and Budget in the Executive Office of the President should be used as the source of classifications, short titles, and codes for representing industries as prescribed by FIPS PUB 66. This Manual supersedes in its entirety the classifications, short titles and codes that were published in FIPS PUB 66, dated 1979 August 15.

Waiver Procedure. Under certain exceptional circumstances, the heads of Federal departments and agencies may approve waivers to Federal Information Processing Standards (FIPS). The head of such agency may redelegate such authority only to a senior official designated pursuant to Section 3506(b) of Title 44, U.S. Code. Waivers shall be granted only when:

- a. compliance with a standard would adversely affect the accomplishment of the mission of an operator of a Federal computer system, or
- b. cause a major adverse financial impact on the operator which is not offset by Governmentwide savings.

Agency heads may act upon a written waiver request containing the information detailed above. Agency heads may also act without a written waiver request when they determine that conditions for meeting the standard cannot be met. Agency heads may approve waivers only by a written decision which explains the basis on which the agency head made the required finding(s). A copy of each such decision, with procurement sensitive or classified portions clearly identified, shall be sent to: National Institute of Standards and Technology; ATTN: FIPS Waiver Decisions, Technology Building, Room B-154; Gaithersburg, MD 20899.

In addition, notice of each waiver granted and each delegation of authority to approve waivers shall be sent promptly to the Committee on Government Operations of the House of Representatives and the Committee on Governmental Affairs of the Senate and shall be published promptly in the Federal Register.

When the determination on a waiver applies to the procurement of equipment and/or services, a notice of the waiver determination must be published in the Commerce Business Daily as a part of the notice of solicitation for offers of an acquisition or, if the waiver determination is made after that notice is published, by amendment to such notice.

A copy of the waiver, any supporting documents, the document approving the waiver and any supporting and accompanying documents, with such deletions as the agency is authorized and decides to make under 5 U.S.C. Section 552(b), shall be part of the procurement documentation and retained by the agency.

Where to Obtain Copies. Copies of the Standard Industrial Classification (SIC) Manual for 1987 are for sale by the National Technical Information Service, U.S. Department of Commerce, Springfield, VA 22161.

Hardbound copies of the Standard Industrial Classification (SIC) Manual for 1987 (PB87-100012, \$30.) may be ordered from NTIS.

A computer tape version, including documentation, (9-Track, 1600 or 6250 bpi) may be ordered as PB87-100020, \$240. Also available on high density diskettes (PB87-199576, \$195.) by special request and a computerized SIC index for microcomputers which has search retrieval (PB91-507947, \$149). Add \$3 handling fee per order.
